

{panel:title=User Story / Objective | titleBGColor=#63BA3B | titleColor=white}

\_Short indication of the request and purpose from user perspective, typically describing the most common application. E.g. As a ... I would like... ... so that I ...

The user story corresponds to placeholder, with details filled out in ongoing conversation with the user(s).\_

{panel}

{panel:title=Use Case | titleBGColor=#63BA3B | titleColor=white}

\_A use case is a more detailed description of the application, including not only the top-of-mind user story but also additional functionality and development work that might be needed, such as for edge-cases. We typically will not completely specify the use case when a story is created.\_

{panel}

{panel:title=Business Value | titleBGColor=#63BA3B | titleColor=white | borderStyle=none}

\_What do you expect from this enhancement in terms of money, quality, image etc.?\_

{panel}

{panel:title=Dependencies | titleBGColor=#63BA3B | titleColor=white | borderStyle=none}

\_Is this issue depending on other issues? Is someone else waiting for completing this task? Is there a deadline for this user story?\_

{panel}

{panel:title=Deliverables | titleBGColor=#63BA3B | titleColor=white | borderStyle=none}

\_Typically includes working code committed to Bitbucket, confluence documentation and powerpoint slides for sprint demo. May also include code review and stakeholder signoff.\_

{panel}

{panel:title=References | titleBGColor=#63BA3B | titleColor=white | borderStyle=none}

\_Add here related information\_

{panel}

{panel:title=Risks | titleBGColor=#63BA3B | titleColor=white | borderStyle=none}

\_What are the risks associated with this change?\_
